Quantum University, Roorkee

Study & Evaluation Scheme

Study Summary

Name of the Faculty	Faculty of Health Sciences
Name of the School	Quantum School of Health Sciences
Name of the Department	Department of Paramedical Sciences
Program Name	Bachelor of Science in Medical Radiology and Imaging Technology
Duration	3 Years + 6 months internship
Medium	English

Evaluation Scheme

Type of Papers	**Internal Evaluation (%)**	**End Semester Evaluation (%)**	**Total (%)**
Theory	40	60	100
Practical/ Dissertations/Project Report/ Viva-Voce	40	60	100
Internal Evaluation Components (Theory Papers)			
Mid Semester Examination	60 Marks		
Assignment –I	30 Marks		
Assignment-II	30 Marks		
Attendance	30 Marks		
Internal Evaluation Components (Practical Papers)			
Quiz One	30 Marks		
Quiz Two	30 Marks		
Quiz Three	30 Marks		
Lab Records/ Mini Project	30 Marks		
Attendance	30 Marks		
End Semester Evaluation (Practical Papers)			
ESE Quiz	40 Marks		
ESE Practical Examination	40 Marks		
Viva- Voce	20 Marks		

Structure of Question Paper (ESE Theory Paper)

The question paper will consist of 5 questions, one from each unit. Students have to Attempt all questions. All questions carry 20 marks each. Parts a) and b) of question Q1 to Q5 will be compulsory and each part carries 2 marks. Parts c), d) and e) of Q1 to Q5 Carry 8 marks each and the student may attempt any 2 parts.

Important Note:

1.The purpose of the examination should be to assess the Course Outcomes (CO) that will ultimately lead to the attainment of Program Outcomes (PO). A question paper must assess the following aspects of learning planned for a Specific Course i.e., Remember, Understand, Apply, Analyze, Evaluate & Create (reference to Bloom's Taxonomy). The standard of question paper will be based on mapped BL level complexity of the unit of the syllabus, which is the basis of CO attainment model adopted in the university.

2. Case Study is essential in every question paper (wherever it is being taught as a part of pedagogy) for evaluating higher-order learning. Not all the courses might have case teaching methods used as pedagogy.

3. There shall be continuous evaluation of the student and there will be a provision of real time reporting on QUMS. All the assignments will be evaluated through module available on ERP for time and access management of the class.

Program Structure – Bachelor of Science in Medical Radiology and Imaging Technology

Introduction

Radiography
This field took birth in 1895 when X-rays were discovered, the process evolved through the years to be used for diagnostic purposes. To provide the right treatment for a disease or ailment, it is necessary to make the correct diagnosis. But it is not always possible to diagnose a disease based on symptoms alone. Here radiography comes to the rescue.

Radiography is used to diagnose the problem by focusing on the internal parts of the anatomy using X-rays, sometimes referred to as „X-ray photography". This field has had a huge impact on the medical field as well as in industrial applications.

Technologist/Technician
This field is a highly technical one and the processes vary, depending on which part of the anatomy or tissue is being imaged. Radiographers are trained to use the equipment and adapt to new technology and procedures. Some important procedures include fluoroscopy, ultrasound or sonography, MRI (Magnetic Resonance Imaging), PET (Positron Emission Tomography) and CT scan

Diagnostic and therapeutic branches
A diagnostic radiographer is required to explain procedures to the patients, help prepare them for the tests, operate and maintain equipment and records. Their assistance is required by physicians in performing procedures such as myelograms (examinations to detect injuries, cysts, or tumors in the spinal cord) and by surgeons in the operating room, usually with portable X-ray or fluoroscopy machines.

Therapeutic radiography, also referred to as radiotherapy, is used in the treatment and diagnosis of diseases such as cancer, tumors and ulcers. Here radiation is used in controlled conditions as an exact amount of radiation would help shrink the tumor size. Their work is closely associated with doctors, nurses, physicists and others from oncology teams in treating patients with cancer. The role of a radiographer in radiotherapy caring for a cancer patient has a broad range, from the initial referral stage, giving pre-treatment information, planning process, treatment and follow-up post-treatment.

Internship: Full Time Six Months
The internship for the qualifying Bachelor of Science in Medical Radiology and Imaging Technology Program will be of six months after completing all prescribed courses. Minimum of 720 hours of an internship is required to be completed by the candidate for the award of degree besides the course work. Students must undertake the rotational postings during which students have to work under the supervision of experienced staff in the following areas:

Sl. No	Postings	Duration
1.	Conventional Radiography	1.5 Months
2.	Radiographic Special Procedures Including Diagnostic and Therapeutic Interventional Procedures	1.5 Months
3.	CR, DR and PACS	1 Month
4.	Computed Tomography	1 Month
5.	Magnetic Resonance Imaging	1 Month

Other Details

- The entire internship shall be done in a Hospital or Medical College.
- Every candidate after successfully completing the final examination of Bachelor of Science in Medical Radiology and Imaging Technology will be required to undergo a compulsory internship up to satisfaction of the University for a period of six months to be eligible for the award of the degree of Bachelor of Science in Medical Radiology and Imaging Technology.
- The University shall issue a provisional degree of Bachelor of Science in Medical Radiology and Imaging Technology on passing the final examination and completion of the internship, if the candidate demands it.
- The internee shall be entrusted with clinical responsibilities under the direct supervision of a Senior Medical Officer/Technologist. They shall not be working independently.
- Internee will not authorize to sign any official certificate/reports during her/his internship.
- A duly signed completed Internship logbook is compulsory to submit to the department/college to obtain an internship completion letter.

Assessment of Internship

- The internship will be evaluated as per the norms of academic regulation of the University. The Internee shall maintain the record of work, which is to be verified and certified by the Technologist followed by HOD Radiology under whom he/she worked.
- The internee will submit an internship completion certificate issued by the concerned hospital/ medical college authority.
- Only after satisfactory completion of an internship, the university shall award the degree of Bachelor of Science in Medical Radiology and Imaging Technology.

Curriculum (21-24) Version 2021

Quantum School of Health Sciences

Bachelor of Science in Medical Radiology and Imaging Technology– PC: 06-3-03

B. Choice Based Credit System (CBCS)

Choice Based Credit System (CBCS) is a versatile and flexible option for each student to achieve his target number of credits as specified by the UGC and adopted by our university.

The following is the course module designed for the Bachelor of Science in Medical Radiology and Imaging Technology program:

Core competency: Students will acquire core competency in Paramedical Studies and in allied subject areas.

Skilled communicator: The course curriculum incorporates basics and advanced training in order to make a graduate student capable of expressing the subject through technical writing as well as through oral presentation.

Critical thinker and problem solver: The course curriculum also includes components that can be helpful to graduate students to develop critical thinking ability by way of solving problems/numerical using basic
& Advance knowledge and concepts of Paramedical Studies.

Sense of inquiry: It is expected that the course curriculum will develop an inquisitive characteristic among the students through appropriate questions, planning and reporting experimental investigation.

Skilled healthcare worker: The course curriculum has been designed in such a manner as to enabling a graduate student to become a skilled healthcare worker by acquiring knowledge about patient handling and management, writing, planning, study of ethical standards and rules and regulations pertaining to patient care.

Ethical awareness/reasoning: A graduate student requires understanding and developing ethical awareness/reasoning which the course curriculums adequately provide.

Lifelong learner: The course curriculum is designed to inculcate a habit of learning continuously through use of advanced ICT technique and other available techniques/books/journals for personal academic growth as well as for increasing employability opportunity.

Value Added Course (VAC)/ Training/ Certification: A value added course is a skill enhancement training beyond the syllabus specially non-credit course which is basically meant to enhance general ability of students in areas like soft skills, quantitative aptitude and reasoning ability, technical new norms of the industry - required for the overall development of a student and at the same time crucial for industry/corporate demands and requirements. The student possessing these skills will definitely develop acumen to perform well during the recruitment process of any premier organization and will have the desired confidence to face the interview. Moreover, these skills are also essential in day-to-day life of the corporate world. The aim is to nurture every student for making effective communication, developing aptitude and a general reasoning ability for a better performance, as desired in corporate world. There shall be no credit; however, it will be compulsory for every student to pass these courses with minimum 45% marks to be eligible for the certificate. These marks will not be included in the calculation of CGPI. Students have to specifically be registered in the specific course of the respective semesters time to time. The department & course coordinator will notify as when starting the course after adequate approval from higher authority.

Skill Enhancement Course: This course may be chosen from a pool of courses designed to provide value-based and/or skill-based knowledge.

Generic/Open Elective (OE): Open Elective is an interdisciplinary additional subject that is compulsory in a program. The score of Open Elective is counted in the overall aggregate marks under Choice Based Credit System (CBCS). Each Open Elective paper will be of 3 Credits in II, III and IV semesters. Each student has to take Open/Generic Electives from department other than the parent department. Core / Discipline Specific Electives will not be offered as Open Electives.

Non CGPA Audit Course (NCAC): This is a compulsory course but not included in CGPA calculation and will be of 2 credits. Each student of Bachelor of Science in Medical Radiology and Imaging Technology Program has to compulsorily pass the Disaster Management.

C. Program Outcomes of Bachelor of Science in Medical Radiology and Imaging Technology

PO-01	Radiology Knowledge:	Possess knowledge and comprehension of the core and basic knowledge associated with the profession of radiology, including medical ethics, machines quality assurance; radiation physics, special procedure technique, conventional radiographic technique, and radiographic positioning and about magnetic resonance imaging, computed tomography and nuclear medicine.
PO-02	Planning Abilities:	Demonstrate effective planning abilities including time management, resource management, delegation skills and managerial skills. Develop and implement plans and organize work to meet deadlines.
PO-03	Problem analysis:	Utilize the principles of scientific enquiry, thinking analytically, clearly and critically, while solving problems and making decisions during daily practice. Find, analyse, evaluate and apply information systematically and shall make defensible decisions.
PO-04	Allied Healthcare provider:	As a healthcare provider applies the acquired knowledge and skills in prevention, investigations and managing patients under the direction of a medical professional.
PO-05	Leadership skills:	Understand and believe the human reaction to change, motivation issues, leadership and team-building when planning changes required for fulfilment of practice, professional and societal responsibilities. Assume participatory roles as responsible citizens or leadership roles when appropriate to facilitate improvement in health and well- being.
PO-06	Professional Identity:	Understand, analyse and communicate the value of their professional roles in society (e.g., Health care professionals, radio-technician, educators, radiation safety officer and can also work in the field of application specialists).
PO-07	Medical Law Ethics:	Honour personal values and apply ethical principles in professional and social contexts. Use ethical frameworks; apply ethical principles while making decisions and take responsibility for the outcomes associated with the decisions.
PO-08	Communication:	Communicate effectively with the rad community and with society at large, such as, being able to comprehend and write effective reports, make effective presentations and documentation, and give and receive clear instructions.
PO-09	The radiologist and society:	Apply reasoning informed by the contextual knowledge to assess societal, health, safety and legal issues and the subsequent responsibilities relevant to the professional radiology practice.
PO-10	Radiation hazards &sustainability:	Understand the impact of the radiation hazards on environmental contexts and demonstrate the knowledge of disposing radiopharmaceutical and need for sustainable development.
PO-11	Life-long learning	Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. Self- access and use feedback effectively from others to identify learning needs and to satisfy these needs on an on-going basis.

D. Program Specific Outcomes:

PSO1: Detail understanding of theoretical and practical knowledge of all core and allied subjects of Radiologic sciences, which includes concept related to radiation physics, radiographic positioning, special radiographic techniques with their manufacturing and QA/QC regulation etc. As an independent professional and a lifelong learner demonstrates high standards of professional ethics, integrity & continuous learning.

PSO2: As a healthcare provider applies the acquired knowledge and skills in prevention, investigations and managing patients under the direction of a medical professional. For the benefit of academicians, hospital/community of radio-technician, application specialists and emphasizing the consequences of the radiation hazards and most importantly Adheres to the Code of Ethics prescribed by the professional body/Faculty/Department and maintains appropriate relationships and boundaries with patients and care givers.

PSO3: Rigorous core course work in allied healthcare to deal with radiographic imaging equipments with the ability to apply standard principles, practices, new technologies and strategies in the field of medical sciences with its new modalities.

E. Program Educational Objectives (PEO's)

PEO1. To be familiar with the concept of Medical Radiology and Imaging Technology for leading a successful career in hospital or as entrepreneur or pursue higher education.

PEO2. To develop their knowledge for their professional skills for providing effective solution to problem using domain of Medical Radiology and Imaging Technology.

PEO3. To instill lifelong learning approach towards constantly technologies with innovative and ethical mindset.

F. Pedagogy & Unique practices adopted:

"Pedagogy is the method and practice of teaching, especially for teaching an academic subject or theoretical concept". In addition to conventional time-tested lecture method, the institute will emphasize on experiential learning:

Role Play & Simulation: Role- play and simulation are forms of experiential learning. Learners take on different roles, assuming a profile of a character or personality, and interact and participate in diverse and complex learning settings. Role-play and simulation function as learning tools for teams and groups or individuals as they "play" online or face-to-face. They alter the power ratios in teaching and learning relationships between students and educators, as students learn through their explorations and the viewpoints of the character or personality they are articulating in the environment. This student-centered space can enable learner-oriented assessment, where the design of the task is created for active student learning. Therefore, role-play& simulation exercises such as virtual share trading, marketing simulation etc. are being promoted for the practical-based experiential learning of our students.

Video Based Learning (VBL) & Learning through Movies (LTM): These days technology has taken a front seat and classrooms are well equipped with equipment and gadgets. Video-based learning has become an indispensable part of learning. Similarly, students can learn various concepts through movies. In fact, many teachers give examples from movies during their discourses. Making students learn few important theoretical concepts through VBL & LTM is a good idea and method. The learning becomes really interesting and easy as videos add life to concepts and make the learning engaging and effective. Therefore, our institute is promoting VBL & LTM, wherever possible.

Field/Live Projects: The students, who take up experiential projects in companies, where senior executives with a stake in teaching guide them, drive the learning. All students are encouraged to do some live project other their regular classes.

Hospital Visits: Hospital visits are essential to give students hand-on exposure and experience of how things and processes work in Hospital. Our institute organizes such visits to enhance students‟ exposure to practical learning and work out for a report of such a visit relating to their specific topic, course or even domain.

MOOCs: Students may earn credits by passing MOOCs as decided by the college. Graduate level programs may award Honors degree provided students earn pre-requisite credits through MOOCs. University allows students to undertake additional subjects/course(s) (In-house offered by the university through collaborative efforts or courses in the open domain by various internationally recognized universities) and to earn additional credits on successful completion of the same. Each course will be approved in advance by the University following the standard procedure of approval and will be granted credits as per the approval. Keeping this in mind, University proposed and allowed a maximum of two credits to be allocated for each MOOC courses. In the pilot phase it is proposed that a student undertaking and successfully completing a MOOC course through only NPTEL could be given 2 credits for each MOOC course.

For smooth functioning and monitoring of the scheme the following shall be the guidelines for MOOC courses, Add-on courses carried out by the College from time to time.

a) It will be necessary for every student to take at least one MOOC Course throughout the programme.

b) There shall be a MOOC co-ordination committee in the College with a faculty at the level of Professor heading the committee and all Heads of the Department being members of the Committee.

c) The Committee will list out courses to be offered during the semester, which could be requested by the department or the students and after deliberating on all courses finalize a list of courses to be offered with 2 credits defined for each course and the mode of credit consideration of the student. The complete process shall be obtained by the College before end of June and end of December for Odd and Even semester respectively of the year in which the course is being offered. In case of MOOC course, the approval will be valid only for the semester on offer.

d) Students will register for the course and the details of the students enrolling under the course along with the approval of the Vice Chancellor will be forwarded to the Examination department within fifteen days of start of the semester by the Coordinator MOOC through the Principal of the College.

e) After completion of MOOC course, Student will submit the photo copy of Completion certificate of MOOC Course to the Examination cell as proof.

f) Marks will be considered which is mentioned on Completion certificate of MOOC Course.

g) College will consider the credits only in case a student fails to secure minimum required credits then the additional subject(s) shall be counted for calculating the minimum credits required for the award of degree.

Special Guest Lectures (SGL) & Extra Mural Lectures (EML): Some topics/concepts need extra attention and efforts as they either may be high in difficulty level or requires experts from specific industry/domain to make things/concepts clear for a better understanding from the perspective of the industry. Hence, to cater to the present needs of industry we organize such lectures, as part of lecture-series and invite prominent personalities from academia and industry from time to time to deliver their vital inputs and insights.

Student Development Programs (SDP): Harnessing and developing the right talent for the right industry an overall development of a student is required. Apart from the curriculum teaching various student development programs (training programs) relating to soft skills, interview skills, SAP, Advanced excel training etc. that may be required as per the need of the student and industry trends, are conducted across the whole program. Participation in such programs is solicited through volunteering and consensus.

Hospital Postings: Establishing collaborations with various Hospitals to deliver the programme on sharing basis. The specific courses are to be delivered by Radiography experts to provide practice-based insight to the students.

Special assistance program for slow learners & fast learners: The program has provision to identify slow and fast learners. Syllabus adheres the University Policy for slow and fast learners. Fast learners are given research problems and higher order learning assignments whereas slow learners are given additional resources and peer group learning across the subjects.

Induction program: Every year 3 weeks induction program is organized for 1st year students and senior students to make them familiarize with the entire academic environment of university including Curriculum, Classrooms, Labs, Faculty/ Staff members, Academic calendar and various activities.

Mentoring scheme: There is Mentor-Mentee system. One mentor lecture is provided per week in a class. Students can discuss their problems with mentor who is necessarily a teaching faculty. In this way, student‟s problems or issues can be identified and resolved.

Competitive exam preparation: Students are provided with one class in every week for Competitive exams preparation.

Extra-curricular Activities: organizing & participation in extracurricular activities will be mandatory to help students develop confidence & face audience boldly. It brings out their leadership qualities along with planning & organizing skills. Students undertake various cultural, sports and other competitive activities within and outside then campus. This helps them build their wholesome personality.

Career & Personal Counseling: - Identifies the problem of student as early as possible and gives time to discuss their problems individually as well as with the parents. Counseling enables the students to focus on behavior and feelings with a goal to facilitate positive change. Its major role lies in giving: Advice, Help, Support, Tips, Assistance, and Guidance.

Participation in Flip Classes, Project based Learning (A2 Assignment), Workshops, Seminars & writing & Presenting Papers: Departments plan to organize the Flip Classes, Project based Learning (A2 Assignment), workshops, Seminars & Guest lecturers time to time on their respective topics as per academic calendar. Students must have to attend these programs. This participation would be count in the marks of general Discipline & General Proficiency which is the part of course scheme as non-credit course.

Formation of Student Clubs, Membership & Organizing & Participating events: Every department has the departmental clubs with the specific club‟s name. The entire student‟s activity would be performed by the club. One faculty would be the coordinator of the student clubs & students would be the members with different responsibility.

Capability Enhancement & Development Schemes: The Institute has these schemes to enhance the capability and holistic development of the students. Following measures/ initiatives are taken up from time to time for the same: Career Counseling, Soft skill development, Remedial Coaching, Bridge Course, Language Lab, Yoga and Meditation, Personal Counseling

Library Visit & Utilization of QLRC: Students may visit the library from morning 10 AM to evening 8 PM. Library created its resources Database and provided Online Public Access Catalogue (OPAC) through which users can be accessed from any of the computer connected in the LAN can know the status of the book. Now we are in process to move from OPAC to KOHA.

Detailed Syllabus (Semester wise /course wise)

SEMESTER 1 Year -1

RD3101	**Title: Human Anatomy- I**	**L T P C** **3 0 0 3**
Version No.	**1.0**	
Course Prerequisites	NIL	
Objectives	Anatomy is a key component of all education programs for BMRIT. To develop the basic concept of gross, functional, and applied anatomy and should have a strong focus on organ position, orientation and relationships.	
Unit No.		**No. of hours (per Unit)**
Unit: I	**Terminology and General Plan of the Body**	8
Terminology and General Plan of the Body, Body Parts and Areas, Terms of Location and Position, Body Cavities and Their Membranes, Dorsal cavity, Ventral cavity, Planes and Sections.		
Unit II	**Cells**	7
Cells: Structure, function and location, Prokaryotic and eukaryotic cells, Cell organelles, Cell division Tissue, Types, Structure, Location and Function of Epithelial Tissue, Connective Tissue, Muscle Tissue, Nerve Tissue, Membranes, Glandular tissue, The Integumentary System: structure and function of The Skin, Subcutaneous Tissue		
Unit III	**Musculoskeletal System**	7
Musculoskeletal System: Basic anatomy of important muscles and bones		
Unit IV	**Respiratory system**	7
Respiratory system: Basic anatomy of nose, larynx, trachea, bronchi and lungs		
Unit V	**Digestive system**	7
Digestive system: basic anatomy of esophagus, stomach, small intestine, large intestine, liver, Gall bladder, pancreas.		
Text Books	1. Waugh A, Grant A. Ross & Wilson Anatomy and Physiology in Health and Illness E-Book. Elsevier Health Sciences Chaurasia BD, Garg K. BD	
Reference Books	1. Chourasia‟s Human Anatomy: Lower limb, abdomen & pelvis. CBS Publishers& Distributors. 2. Principles of Anatomy and Physiology, Gerard J. Tortora and Bryan H. Derrickson	
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3101

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship(Ent)/ None (*Use, for more than one*)
CO1	Students will be able to learn about Terminology, General Planes, Body Cavities and Their Membranes.	1	S
CO2	Students will be able to study about cells, tissue, and the integumentary system of human body.	1	S
CO3	Students will be able to know about Introduction of Musculoskeletal System: Basic anatomy of muscles and bones.	2	S
CO4	Students will be able to study the basic anatomy of respiratory system and its clinical disorders.	2	S
CO5	Students will be able to learn basic anatomy of esophagus, stomach, small & large intestine, liver, Gall bladder, pancreas.	3	S

RD3106	Title: Basics of Human Physiology- I	L T P C 3 0 0 3
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	To enable the students to understand the normal functioning of Various organ systems of the body, and their interactions.	
Unit No.		No. of hours (per Unit)
Unit: I	Cell physiology	7
Cell physiology: Structure, membrane, transport across cell membrane, Active, Passive, Organization of the Body, Body Composition, Body Fluid Volumes and its measurement, Diffusion, Osmosis, Tonicity, Homeostasis		
Unit II	Blood	7
Blood-composition, function, cellular component & their function, hemoglobin & anemia, blood groups and coagulation Lymphatic system-Composition & function of lymph, lymphatic tissue, Immunity with the role of thymus		
Unit III	Cardiovascular system	7
Cardiovascular system-general arrange, heart, arteries, veins and capillaries, heart structure and function, cardiac cycle, heart sounds, heart rate, blood pressure, mechanism of circulation, definition of hypertension & shock		
Unit IV	Respiratory system	7
Respiratory system: parts of respiratory system, mechanism of respiration, pulmonary function, pulmonary circulation, lungs volume, Gas transport between lungs and tissues, Definition of hypoxia, dyspnea, cyanosis, asphyxia, and obstructive airways diseases		
Unit V	Gastrointestinal physiology	8
Gastrointestinal physiology: Organs of GIT and their structure & function, secretion, digestion, absorption and assimilation, gastrointestinal hormones, physiology of digestion of carbohydrates, proteins & lipids, Structure & function of liver, spleen, gall bladder &pancreas, Jaundice, Cirrhosis & Pancreatitis.		
Textbooks	1. Sembulingam K, Sembulingam P. Essentials of medical physiology. JP Medical Ltd.	
Reference Books	1. Arthur C, Guyton MD, Hall JE. Textbook of medical physiology. WBSaunders, Philadelphia. 2000:392-401. 2. Tortora GJ, Derrickson BH. Principles of anatomy and physiology. John Wiley& Sons.	
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3106

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to study about Cell physiology related to cell membrane, Body fluids composition, Homeostasis, Active & Passive Diffusion,	3	Emp
CO2	Students will be able to study about Gastrointestinal physiology and its clinical diagnosis.	3	Emp
CO3	Students will be able to know about Introduction of cardiovascular system and its clinical diagnosis.	2	Emp
CO4	Students will be able to learn about Introduction of respiratory system and its clinical diagnosis.	3	Emp
CO5	Students will be able to learn about blood and Excretory system	2	Emp

ND3105	Title: Biochemistry	L T P C 3 0 0 3
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	To enable the students to understand about the equipments used in labs and their applications. To develop the basic concepts of Lab diagnosis for Radiology.	
Unit No.		No. of hours (per Unit)
Unit: I	Introduction to Fundamental and Clinical Biochemistry	7
Introduction to Fundamental and Clinical Biochemistry, First aid in laboratory accidents. Principle, working, care & maintenance of Weighing balance, hotplate, centrifuges, incubator, hot air oven, colorimeter, spectrophotometer, pH meter.		
Unit II	Buffers	8
Preparation of solution and reagents, normal solution, molar solutions, percent solution, buffer solution, dilutions, w/v, v/v, concepts of acid and base, units of measurement: SI unit, reference range, conversion factor, units for measurement of enzymes, protein, osmolarity, drugs, hormones, vitamins.		
Unit III	Carbohydrates, Lipids and Enzyme	7
Carbohydrates: Structure, Classification and their function in biological system. Proteins: Classification, Primary, secondary and tertiary structure and functions of protein. Amino acids: classification, Structure, properties and biological functions. Lipids: Classification of lipids, Classification of fatty acids, their biological functions. Enzymes: Definition, classification of enzyme, units for measuring enzyme activity.		
Unit IV	Nucleic acids	7
Nucleic acids: Structure, function and types of DNA and RNA. Nucleotides, Nucleosides, Nitrogen bases, and role of Nucleic acid.		
Unit V	Vitamins	7
Vitamins: classification, function and disease associated with vitamins. Role of Minerals and ions: Calcium, Iron, Iodine, Zinc, Phosphorus, Copper, Potassium, Zinc.		
Textbooks	1. Vasudevan DM, Sreekumari S, Vaidyanathan K. Textbook of biochemistry for medical students. JP Medical Ltd.	
Reference Books	1. Hames BD, Hooper NM, Hames BD. Instant notes in biochemistry. Biochemical education. 2. Devlin TM, editor. Textbook of biochemistry: with clinical correlations.	
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for ND3105

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be Introduced to Fundamental and Clinical Biochemistry.	1	Emp
CO2	Students will be able to study about buffers.	1	Emp
CO3	Students will be able to study about classification of carbohydrates, lipids, and enzymes.	2	Emp
CO4	Students will be able to learn about Nucleic acids: Structure, function and types of DNA and RNA.	3	Emp
CO5	Students will be able to learn about vitamins and minerals.	2	Emp

RD3104	Title: Radiation Physics	L T P C 3 2 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	To enable the students to gain knowledge on the field of radiation along with the basic atomic and electric physics to the designing of x-ray circuits and its system.	
Unit No		No. of hours (per Unit)
Unit: I	The Atom	10
Definition, Thomson Atom, Bohr Atom, Atomic Structure, Electron Binding Energy, Radioactivity, laws of radioactivity and decay schemes of different alpha, Beta, gamma ray.		
Unit II	Electromagnetic Radiation	9
Photon, Velocity and amplitude, Frequency and wavelength, Electromagnetic Spectrum, Inverse square law, Units and quantities of radiation, dose measurement for various diagnostic procedures.		
Unit III	Electricity And Magnetism, Electromagnetism	10
Electrostatics, Laws of electrostatics, Coulomb‟s law, Electrodynamics, Ohm‟s laws, Alternative & Direct Current, Magnet, Classification of magnets, Magnetic laws. Electromagnetic Effect, Faraday‟s & Lenz‟s law of Electromagnetic Induction, Generator, Transformers, Laws of Transformers, Types of Transformers		
Unit IV	X-Ray Imaging System, Image Quality	10
Operating console, Autotransformers, Control of kVp, mAs, Exposure Timers, Voltage Rectification, Exposure, attenuation, absorption, contrast, resolution, sharpness, noise, various factors determining image quality.		
Unit V	X-Ray Circuits Components	9
Filament Circuit, High voltage circuit, Switched, Fuses, Circuit Breakers Beam limiting Devices-Cones, Cylinders, collimator, Grids, Filters.		
Text Books	1. Curry TS, Dowdey JE, Murry RC. Christensen's physics of diagnostic radiology. Lippincott Williams & Wilkins.	
Reference Books	1. Holmberg O, Malone J, Rehani M, McLean D, Czarwinski R. Current issues and actions in radiation protection of patients. 2. Dendy PP, Heaton B. Physics for diagnostic radiology. CRCpress.	
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3104

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to study the basic structure of Atom and Radioactivity, laws of radioactivity.	3	Emp
CO2	Students will be able to Learn about electromagnetic radiation.	2	Emp
CO3	Students will be able to study about electricity, magnetism, and electromagnetism.	3	Emp
CO4	Students will be able to Learn about x-ray imaging system and its image quality factors.	3	Emp
CO5	Students will be able to study about x-rays circuits and its components.	3	Emp

EG3102	**Title: Professional Communication**	**L T P C** **2 0 0 2**
Version No.	**1.0**	
Course Prerequisites	NIL	
Objectives	To introduce students to the theory, fundamentals, and tools of communication and to develop in them vital communication skills	
Unit No.		**No. of hours (per Unit)**
Unit I	**Fundamentals of Communication**	5
Introduction–Communication Process, Distinction between General and Technical Communication. Language as a Tool of Communication; Interpersonal, Organizational, Mass Communication. Formal Communication: Downward, Upward, Lateral/ Horizontal, Diagonal; Informal Communication (Grapevine). Barriers to Communication		
Unit II	**Components of Technical Written Communication**	5
Vocabulary building: Synonyms and Antonyms, Homophones, Conversions. Common Grammatical Errors, Paragraph Development, Précis writing. Technical Papers: Project, Dissertation and Thesis.		
Unit III	**Forms of Business Communication**	5
Business Correspondence- Types: Memorandum; Official letters. Job Application, Resume/CV/Bio-data; Notice, Agenda, Minutes of Meetings. Technical Proposal: Types, Significance, Format and Style of Writing Proposals. Technical Report: Types, Significance, Format and Style of Writing Reports.		
Unit IV	**Presentation Techniques and Soft Skills**	5
Presentation- Defining Purpose, Audience and Location; Organizing Contents; Preparing Outline; Audio-Visual Aids in Presentations. On-Verbal Aspects of Presentation: Kinesics, Proxemics, Chronemics, Paralanguage. Listening Skills: Importance, Active and Passive listening. Speaking Skills: Common Errors in Pronunciation; Vowels, Consonants and Syllables; Accent, Rhythm and Intonation.		
Unit V	**Value-based Text Readings**	4
Thematic and value-based critical reading of the following essays with emphasis on the mechanics of writing and speaking:1. The Language of Literature and Science by Aldous Huxley 2. Of Discourse by Francis Bacon		
Suggested Reference Books	1. Barun K. Mitra, *Effective Technical Communication*, OxfordUniv.Press 2. Meenakshi Raman and Sangeeta Sharma, *Technical Communication-Principles and Practices*, OxfordUniv.Press 3. Prof.R.C. EG3140	Title: Professional Communication Lab	L T P C 0 0 2 1
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	To provide practice to students in an interactive manner to apply the fundamentals and tools of English communication to life situations	
Experiment No.	List of Experiments	

1. Common conversation skills
2. Introductions
3. Making requests
4. Asking for permission
5. Asking questions
6. Describing events, people, places
7. Learning correct pronunciation, syllable, stress, intonation
8. Extempore speaking
9. Role play
10. Presentation skills
11. Grammar-tense practice
12. Mother tongue influence-correction
13. Speech making / public speaking
14. Listening effectively
15. E-mail Etiquettes

Mode of Evaluation	Internal and External Examinations
Recommendation by Board of Studies on	24/07/2021
Date of approval by the Academic Council	14/11/2021

CY3205	Title: Environmental Studies	L T P C 2 0 0 2
Version No.	3.0	
Course Prereq uisites	NIL	
Objective	The objective of the course is to understand about issues related to the environment and theirimpact on human life.	
Unit No.	Unit Title	No. of hours (per Unit)
Unit I	Introduction to Environmental studies & Ecosystems	5
Multidisciplinary nature of environmental studies, Scope and importance,Need for public awareness. Concept, Structure and function of an ecosystem, Energy flow in an ecosystem: food chains, food webs and ecological pyramids.Examples of various ecosystems such as: Forest, Grassland, Desert, Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)		
Unit II	Natural Resources: Renewable & Non- renewable resources	5
Land as a resource, land degradation, landslides (natural & man-induced), soil erosion and desertification. Forests & forest resources: Use and over-exploitation, deforestation. Impacts of deforestation, mining, dam building on environment and forests. Resettlement and rehabilitation of project affected persons; problems and concerns with examples. Water resources: Use and over-exploitation of surface and ground water, floods, drought, conflicts over water (international & inter-state).Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems with examples. Energy resources: Renewable and non renewable energy sources, use of alternateenergy sources, growing energy needs.		
Unit III	Biodiversity & Conservation	5
Levels of biological diversity: genetic, species and ecosystem diversity. Bio-geographic zones of India. Ecosystem and biodiversity services. Biodiversity patterns and global biodiversity hot spots, India as a mega-biodiversity nation; Endangeredand endemic species of India. Threats to biodiversity: Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions. Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.		
Unit IV	Environmental Pollution	4
Environmental pollution and its types. Causes, effects and control measures of :a) Air pollution b) Water pollution – freshwater and marine c) Soil pollution d) Noise pollution e) Thermal pollution, Nuclear hazards and human health risks,Solid waste management: Control measures of urban and industrial waste.		
Unit V	Environmental Policies & Practices	5

Concept of sustainability and sustainable development. Water conservation & watershed management. Climate change,global warming, acid rain, ozone layer depletion. Disaster management: floods, earthquake, cyclones and landslides. Wasteland reclamation. Environment Protection Act. Air (Prevention and Control of Pollution) Act. Water (Prevention and control of Pollution) Act, Wildlife Protection Act, Forest Conservation Act, Issues involved in enforcement of environmentallegislation. Environment: rights and duties. Population growth. **Field work** Visit to a local polluted site- Urban/Rural/Industrial/AgriculturalStudy of simple ecosystems-pond, river, hill slopes, etc.	
Text Books	1. Bharucha. E, Textbook of Environmental Studies for Undergraduate Courses.
Reference Books	1. Kaushik Anubha, Kaushik C P, Perspectives in Environmental Studies New AgePublication. 2. Rajagopalan, Environmental Studies from Crisis to Cure, Oxford University Press.
Mode of Evaluation	Internal and External Examinations
Recommendation byBoard of Studies on	24/07/2021
Date of approval by the Academic Council	14/11/2021

Course Outcome for CY3205

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to understand about issues related to the environment and their impact on human life.	3	S
CO2	Students will be able to understand about the solutions related to the environmental problems.	2	S
CO3	Students will be able to understand about different components of the environment and their function and sustainable development.	3	S
CO4	Students will be able to Comprehend the importance of ecosystem and biodiversity	3	S
CO5	Students will be able to correlate the human population growth and its trend to the environmental degradation	3	S

RD3140	Title: Human Anatomy- I Lab	L T P C 00 2 1
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	To develop the basic concept of gross, functional and applied anatomy.	
Experiment No	List of Experiments	
1. Major organs through models and permanent slides. 2. Parts of circulatory system from models. 3. Parts of respiratory system from models. 4. Digestive system from models. 5. Excretory system from models.		
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3140

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to learn about Major organs through models and permanent slides	1	Emp
CO2	Students will be able to study about Parts of Circulatory system from models.	2	Emp
CO3	Students will be able to study about Parts of respiratory system from models.	3	Emp
CO4	Students will be able to learn about Digestive system from models	2	Emp
CO5	Students will be able to learn about Excretory system from models.	3	Emp

RD3143	Title: Basics of Human Physiology- I Lab	L T P C 0 0 2 1
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	To enable the students to understand the normal functioning of various organ systems of the body.	
Experiment No.	List of Experiments	
1. To measure pulse rate 2. To measure blood pressure 3. To measure temperature 4. Measurement of the Vital capacity 5. Determination of blood groups 6. Transport of food through esophagus 7. Calculation and evaluation of daily energy and nutrient intake. 8. Measurement of basal metabolic rate 9. Demonstration of ECG 10. Bile juice secretion and execration 11. Urine formation and execration		
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3143

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to learn about measurement of pulse rate, blood pressure & temperature	1	Emp
CO2	Students will be able to learn about Measurement of the Vital capacity & determination of blood groups	2	Emp
CO3	Students will be able to learn about transport of food throughesophagus, Bile juice secretion and excretion & Urine formation and execration	2	Emp
CO4	Students will be able to learn about determination of blood group	1	Emp
CO5	Students will be able to learn about Calculation and evaluationof daily energy and nutrient intake.	3	Emp

SEMESTER 2 Year -1

RD3201	**Title: Human Anatomy- II**	**L T P C** **3 0 0 3**
Version No.	**1.0**	
Course Prerequisites	NIL	
Objectives	To develop and to ensure proper knowledge on description, orientation and positions of organs and their relations to other organs.	
Unit No.		**No. of hours (per Unit)**
Unit: I	**Cardiovascular system**	8
Cardiovascular system: Basic anatomy of heart and important blood vessels, Brief introduction about Lymphatic System		
Unit II	**The Nervous System**	7
The Nervous System: Basic anatomy of brain and spinal cord, meninges and cerebrospinal fluid, Cranial Nerves		
Unit III	**Endocrine System**	7
Endocrine System: Brief anatomy of Pituitary, Thyroid, Parathyroid, Pancreas, Adrenal		
Unit IV	**Special Senses**	7
Special Senses: Basic anatomy of eye, ear and nose		
Unit V	**Genitourinary system**	7
Genitourinary system: Basic anatomy of kidney and associated organs, male reproductive organs, female reproductive organs		
Textbooks	1. Waugh A, Grant A. Ross & Wilson Anatomy and Physiology in Health and Illness E-Book. Elsevier Health Sciences, Chaurasia BD, Garg K.BD 2. Chourasia‟s Human Anatomy: Lower limb, abdomen & pelvis. CBS Publishers &Distributors.	
Reference Books	1. Garg K. BD Chourasia‟s Human Anatomy–Regional and Applied Dissection and Clinical: Volume 1 Upper Limb and Thorax. 2. Principles of Anatomy and Physiology, Gerard J. Tortora and Bryan H. Derrickson	
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3201

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to learn the basic anatomy of cardiovascular system and clinical disorders	3	Emp
CO2	Students will be able to study the basic anatomy of brain and spinal cord, meninges, and cerebrospinal fluid.	2	Emp
CO3	Students will be able to know about the Endocrine System: Anatomy of Pituitary, Thyroid, Parathyroid, Pancreas, Adrenal glands.	2	Emp
CO4	Students will be able to study the basic anatomy of special senses.	3	Emp
CO5	Students will be able to study the basic anatomy of Genitourinary organs and reproductive system.	2	Emp

RD3206	Title: Basics of Human Physiology- II	L T P C 3 0 0 3
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	To enable the students to recognize the anatomical structures and explain the physiological function of body systems.	
Unit No.		No. of hours (per Unit)
Unit: I	Organs of Excretory System	7
Organs of Excretory System: Kidneys, Nephron, Mechanism of Excretion, Urine formation (Glomerular filtration and Tubular reabsorption), Electrolytes: their balances and imbalances Introduction of acidosis and alkalosis		
Unit II	Muscle nerve physiology	7
Muscle nerve physiology, types of muscles, their gross structural and functional difference with reference to Properties		
Unit III	Nervous system	7
Nervous system- general organization of CNS, function of important structure and spinal cord, neuron, nerve impulse, type of nerves according to function, Autonomic nervous system-organization &function Special senses- general organization & functions		
Unit IV	Endocrine System	8
Endocrine System: Brief introduction about endocrine glands and their secretion, common endocrinological disorder such as diabetes mellitus, hyper & hypothyroidism, dwarfism, gigantism, tetany.		
Unit V	Reproductive System	7
Reproductive System: male & female reproductive organs, sex hormones, secondary sexual characteristics, puberty, spermatogenesis, oogenesis, menstrual cycle, pregnancy, menopause, contraceptive measures.		
Textbooks	1. Sembulingam K, Sembulingam P. Essentials of medical physiology.JP Medical Ltd; 2012.	
Reference Books	1. Arthur C, Guyton MD, Hall JE. Textbook of medical physiology Saunders, Philadelphia. 2. Tortora GJ, Derrickson BH. Principles of anatomy and physiology. John Wiley &Sons.	
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3206

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to learn the physiology of excretory organs.	3	Emp
CO2	Students will be able to study about muscle nerve physiology and types of muscles.	2	Emp
CO3	Students will be able to know about Introduction of Nervous system i.e.: general organization of CNS and ANS.	1	Emp
CO4	Students will be able to study about endocrine system and its clinical disorders.	1	Emp
CO5	Students will be able to study about reproductive system and its clinical disorders.	2	Emp

RD3203	Title: Radiographic Positioning- I	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn basic and special projections for the better and delineation diagnosis of the diseased conditions of different anatomical structure.	
Unit No.		No. of hours (per Unit)
Unit: I	Cranial bones and facial bones	7
Cranial bones and facial bones: Related radiological anatomy, **Basic & special projections:** Cranium Base of skull, Sella turcica, Mastoids, Optic foramina and Orbits, Nasal bone, TM joint, Facial bone, Zygomatic arches, Mandible, Para nasal sinuses		
Unit II	Neck	7
NECK: Related radiological anatomy, Positioning- AP, LAT		
Unit III	Thorax	8
THORAX: Related radiological anatomy, Chest X-ray –AP, LAT, Special projections		
Unit IV	Abdomen	7
ABDOMEN: Related radiological anatomy, **Basic & special projection:** Basic, AP supine (KUB), Special, PA prone, Lateral decubitus, Erect AP, Dorsal decubitus, Lateral, Acute abdomen: three-way series		
Unit V	KUB	7
KUB: Related radiological anatomy, Positioning- AP

CS3102	Title: Fundamentals of Computer Applications	L T P C 3 0 0 3
Version No.	1.0	
Course Prerequisites	NIL	
Objective	This subject aims to make student handy with the computer‟s basics and programming.	
Unit No.		No. of hours (per Unit)
Unit 1	Architecture of Computer	4
What is Computer: Brief History and Evolution Chain, Concept of Hardware, The Inside Computer [Hard Drives (HD), Solid State Drives (SSD), Concept of CPU, Concept Of RAM		
Unit 2	Arithmetic of Computer	5
Number System [Decimal, Binary, Octal, Hexadecimal], Conversions, Binary Arithmetic [Addition, Subtraction, Multiplication, Division, 1s Compliment, 2s Compliment		
Unit 3	Algorithms & Flow Chart	5
Algorithm [What is Algorithm? Algorithm Writing Examples] Flow Chart [What is Flow Chart? Flow Chart Symbols, how to make Flow Chart? Types of Flow Chart, Flow Chart Examples]		
Unit 4	Basics of DOS	5
Disk Operating System: Dos Commands Internal - DIR, MD, CD, RD, COPY, DEL, REN, VOL, DATE, TIME, CLS, PATH, TYPE. External- CHKDSK, XCOPY, PRINT, DISKCOPY, DISCOMP, DOSKEY, TREE, MOVE, LABEL, APPEND, FORMAT, SORT, FDISK, BACKUP, EDIT, MODE, ATTRIB HELP, SYS.		
Unit 5	Windows Concepts	5
Hardware requirements of Windows, Windows, Windows concepts, Calculator, Notepad, Paint, and Windows Explorer: Creating folders and other explorer facilities. Entertainment, CD Player, DVD Player, Media Player, Sound Recorder, Volume Control.		
Textbooks	Computer Fundamentals by P.K. Sinha	
Reference Books	Computer Fundamentals by Anita Goel “Pearson “ Google Windows help	
Mode of Evaluation	Internal and External Examinations	
Recommended by Board of Studied on	24/07/2021	
Date of Approval by the Academic Council on	14/11/2021	

Course Outcome for CS3102

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to learn the architecture of computer.	1	Emp
CO2	Students will be able to study the arithmetic of computer.	2	Emp
CO3	Students will be able to study the algorithms and flow chart of computer.	3	Emp
CO4	Students will be able to study about disk operating study and its Dos commands.	3	Emp
CO5	Students will be able to learn about hardware of windows concepts.	2	Emp

CS 3141	Title: Fundamentals of Computer Applications Lab	L T P C 0 0 2 1
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The course introduces you to fundamental „Computer Literacy" concepts. You will learn to use Windows on the PC-compatible computers.	
Experiment No	List of Experiments	
1. Dos Commands Internal - DIR, MD, CD, RD, 2. Dos Commands Internal COPY, DEL, REN 3. Dos Commands Internal VOL, DATE, TIME 4. Dos Commands Internal CLS, PATH, TYPE 5. Dos Commands External- CHKDSK, XCOPY, PRINT, 6. Dos Commands External- DISKCOPY, DISCOMP, DOSKEY 7. Dos Commands External- TREE, MOVE, LABEL, APPEND 8. Dos Commands External- FORMAT, SORT, FDISK 9. Dos Commands External- BACKUP, EDIT, MODE 10. Dos Commands External- ATTRIB HELP, SYS 11. Windows Explorer: Creating folders and other explorer facilities		
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for CS3141

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to learn about Dos Commands Internal - DIR, MD, CD, RD,	1	Emp
CO2	Students will be able to learn about Dos Commands Internal COPY, DEL, REN, CHKDSK, XCOPY, PRINT	2	Emp
CO3	Students will be able to learn about Dos Commands Internal VOL, DATE, TIME, CLS, PATH, TYPE	3	Emp
CO4	Students will be able to learn about FORMAT, SORT, FDISK	2	Emp
CO5	Students will be able to learn about ATTRIB HELP, SYS	3	Emp

SEMESTER 3 Year -2

RD3301	**Title: Radiographic Positioning- II**	**L T P C** **4 0 0 4**
Version No.	**1.0**	
Course Prerequisites	NIL	
Objectives	The objective is to learn basic and special projections for the better and delineation diagnosis of the disease conditions of different Anatomical structure.	
Unit No.		**No. of hours (per Unit)**
Unit: I	**Upper and lower Extremities**	10
Upper and lower Extremity: Related radiological anatomy, Basic & special projections: Finger- PA, Latrobe Hand- PA, LAT Wrist Joint-PA, LAT Forearm- AP, LAT Elbow Joint- AP, LAT Humerus- AP, LAT Femur- AP.LAT Knew Joint- AP, LAT Patella- Skyline View, Intercondylar projection Tibia- AP, LAT Ankle joint- AP.LAT Foot- AP, LAT		
Unit II	**Shoulder joint**	10
Shoulder joint: Related radiological anatomy, Basic & special projections: shoulder: AP, AXIAL Clavicle: AP, AP AXIAL Scapula: AP, Oblique, Y projection		
Unit III	**Pelvic Girdle and proximal**	10
Pelvic Girdle and proximal Femur: Related radiology anatomy, Basic & special projection: Pelvic girdle, AP Pelvis, Frog Lateral, AP axial for pelvic outlet(tayelor method), AP axial for pelvic inlet(modified linienfield method),Posterior oblique- acetabulum(judet method), Hip and proximal femur, AP unilateral hip, Axiolateral, infer superior (danelius – miller method), Unilateral frog leg(modified cleaves method), Modified Axiolateral (Clements- nakayama method),Sacroiliac joints: AP, posterior oblique		
Unit IV	**Whole Spine Positioning**	10
Cervical spine - Related radiological anatomy, Basic projection- AP open mouth (C1 and C2), AP axial, Oblique, Lateral, Erect, Trauma lateral (horizontal beam), Cervicothoracic junction (swimmers view), Special views, Lateral- hyperflexion and hyperextension, AP (Fuchs method) or PA (Judd method), AP wagging jaw (ottonello method), AP axial (pillars) Thoracic spine- Related radiographic anatomy, Basic Projections- AP, Lateral, Oblique Lumbar spine, sacrum and coccyx- Related radiographic anatomy, Basic Projections- Lumbar spine, AP Oblique, Lateral, Lateral (L5 – S1), AP axial (L5 – S1), Scoliosis series, AP or PA, Erect lateral, AP (Ferguson method), AP – R and L bending, Spinal fusion series, AP or PA – R and L bending, Lateral – hyperextension and hyper flexion Sacrum and Coccyx, AP axial sacrum, AP axial coccyx, Lateral sacrum, Lateral coccyx.		
Unit V	**Pediatrics Radiography**	8
Pediatrics radiography Positioning, care and radiation protection while handling babies		
Textbooks	1. Whitley AS, Jefferson G, Holmes K, Sloane C, Anderson C, Hoadley G. Clark's Positioning in Radiography 13E. CRC Press; 2015 Jul 28. 2. Bontrager KL, Lampignano J. Textbook of Radiographic Positioning and Related Anatomy-E-Book. Elsevier Health Sciences; 2013 Aug 7.

RD3302	Title: Conventional Radiographic Technique I	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The main objective is too aware the student about the conventional technique of radio imaging technique like (manual image processing & fluoroscopy / dynamic imaging) along with the image formation, developing and reading	
Unit No.		No. of hours (per Unit)
Unit: I	Introduction to Radiologic Imaging	10
Radiation, Sources of radiation, Radioactivity, Half-life, Ionizing & Non-ionizing Radiation, History of x-ray production, Development of modern Radiology. X-Ray Tube- External components- X-ray tube support, Protective housing, Glass or metal Enclosure, Internal components- cathode, anode, focusing cup, focal spot, Line focus principle, Heel effect, X-ray tube failure, Rating charts		
Unit II	X-ray production	9
Characteristic Radiation, Bremsstrahlung Radiation, X-ray Emission Spectrum, Properties of X-ray, X-ray quality, X-ray quantity, Half value layer. Interaction of x-ray with matter- Coherent scattering, Compton effect, Photoelectric effect, Pair Production, Photodisintegration, Differential absorption.		
Unit III	The Recording System	10
X-ray film construction, Emulsion, Formation of latent image, Types of film, Handling and storage of film, Construction of Intensifying screen, Luminescence, screen characteristics, Cassette construction and types, silver recovery, Film artifacts		
Unit IV	Processing of Latent image	10
Manual Processing, Automatic processing, Processing sequence, wetting, developing, fixing, washing, Drying, Processing area (Dark room) Characteristic curve, Optical density, Geometry of Radiographic image- magnification, distortion, focal spot, Blur, Subject factors.		
Unit V	Fluoroscopy	9
Introduction to fluoroscopy, Techniques of fluoroscopy, Image Intensifier, Flux Gain, Brightness gain, Minification gain, Multifield image intensifier, Cathode ray tube.		
Textbooks	1. Brant WE, Helms CA, editors. Fundamentals of diagnostic radiology. Lippincott Williams & Wilkins; 2012 Mar 20. 2. Curry TS, Dowdey JE, Murray RC. Introduction to the physics of diagnostic radiology. 3. Adam A, Dixon AK, Gillard JH, Schaefer-Prokop C, Grainger RG, Allison DJ. 4. Grainger & Allison's Diagnostic Radiology E-Book. Elsevier Health Sciences.	
Reference Books	1. D N and M O Chesney- X ray equipments for student radiographers- Third edition 2. Burgener FA, Kormano M. Differential diagnosis in conventional radiology.	
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3302

RD3303	Title: Basics of USG and Mammography	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn basic knowledge on ultrasound and Doppler equipments for various imaging and equipments used for breast imaging and mammography techniques.	
Unit No.		No. of hours (per Unit)
Unit: I	Introduction to Ultrasound Imaging	9
Sound, Ultrasound, Attenuation, Echoes, Basic principle of Ultrasound imaging, Advantages and Disadvantages		
Unit II	Instrumentation of Ultrasonography	10
Controls of Ultrasound Equipment, USG probes, Coupling agent, Cathode ray tube, Image Display, USG contrast agent. Piezoelectric Effect- Definition, Types of elements, Properties. Transducers: Construction and operation, Types of transducers		
Unit III	USG Display mode	10
USG Display modes: A mode, B mode, M mode, TM mode. Gray scale imaging Beam focusing, Resolution		
Unit IV	Doppler USG	9
Principle, Doppler effect, Color Doppler, Continuous wave Doppler, Pulsed wave Doppler. USG Bio effects, safety. Mammography- Mammography Equipments and Basic views in Mammography, BIRADS		
Unit V	Clinical Practice	10
Scanning protocol, Indication, Patient preparation, image quality and artifacts in Ultrasound and Mammography,USG Abdomen, PCPNDT Act		
Text Books	1. Zwiebel WJ, Sohaey R. Introduction to ultrasound. WB Saunders Company; 1998. 2. Hagen-Ansert SL. Textbook of diagnostic Ultrasonography. Mosby Elsevier; 2006. 3. Basics of Ultrasonography for Radiographers and Technologists- Latest edition	
Reference Books	1. Tucker AK, Ng YY. Textbook of mammography. Churchill Livingstone; 2001. 2. Wentz G, Parsons WC. Mammography for radiologic technologists. McGraw-Hill, Health Professions Division; 1997.	
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021

RD3304	Title: Special Radiographic Procedure	L T P C 3 0 0 3
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn contrast imaging techniques under the guidance of fluoroscopy, administration of contrast media and its safety aspect.	
Unit No.		No. of hours (per Unit)
Unit: I	Introduction to Radiographic Special Procedures	8
Contrast Media- Application, types, safety aspects & administration, Reaction to contrast media and management of contrast reactions.		
Unit II	Ba Studies	7
Barium swallow, Barium meal, Barium meal follow through (BMFT) Barium enema, Enteroclysis.		
Unit III	Routine Special Examinations	7
Intravenous urogram (IVU), Micturating Cystourethrogram (MCU), Ascending Urethrogram (ASU)/ RGU, Hysterosalpingography (HSG)		
Unit IV	Spine and Hepatobiliary Exams	7
Myelography ERCP/ PTBD, PTC, T – tube cholangiography		
Unit V	FNAC	7
Sialography, Dacrocystography, Sinogram, Fistulogram, FNAC, Biopsy		
Text Books	1. Curry TS, Dowdey JE, Murry RC. Christensen's physics of diagnostic radiology. Lippincott Williams & Wilkins; 1990. 2. Brant WE, Helms CA, editors. Fundamentals of diagnostic radiology. RD3306	Title: Orientation in Para Clinical Sciences	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn Parasitology, Microbiology, Pharmacokinetics of Drugs and Virology	
Unit No.		No. of hours (per Unit)
Unit: I	Parasitology	10
Entamoeba Histolytica, Leishmania, Material Parasites of man, Helminthology, Taenia Saginata, Taenia Soleum, Echinococcus granulosus, Ascaris Lumbricoides, Ancylostoma duodenale, Strongylids stercoralis		
Unit II	Microbiology	10
Morphology & Physiology of Bacteria, Staphylococcus, Streptococcus, Mycobacterium tuberculosis, Spirochetes, Cornybacterium Diptheria		
Unit III	Virus	10
General Properties of Virus, Herpes virus, Poliovirus, Hepatitis virus, Oncogenic virus, HIV		
Unit IV	Pathology	10
Inflammation, Neoplasia, Osteomyelitis, Fractures, Osteoporosis, Rickets, Osteomalacia, Tumors of Bone, Rheumatoid Arthritis, Gout, Osteoarthritis		
Unit V	Pharmacology	8
Pharmacokinetics of Drugs (Absorption, Distribution, Metabolism, Excretion), Adverse drug reactions, Management and Pharmacology of different dyes used in Radiological procedures		
Text Books	1. Harsh Mohan *Pathologic Basis & Diseases* Todd & Sanford, *Clinical Diagnosis by Laboratory Method* 2. Ramanik Sood, *Laboratory Technology Methods and Interpretation*

RD 3341	Title: Special Radiographic Procedure Lab	L T P C 0 0 2 1
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn contrast imaging techniques under the guidance of fluoroscopy, administration of contrast media and its safety aspect	
List of Experiments		
1. Radiography of Special radiological procedures, using contrast media as per syllabus. 2. Positioning, Patient preparation, assistance while performing procedures.		
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3341

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to perform all special radiographic procedures done with using contrast media.	2	Emp
CO2	Students will be able to learn about Barium procedures with its pros. and cons.	1	Emp
CO3	Students will be able to perform all routine radiographic procedures related to its clinical diagnosis.	2	Emp
CO4	Students will be able to perform all spine and hepatobiliary procedures related to its clinical diagnosis.	3	Emp
CO5	Students will be able to learn about FNAC procedures with its clinical pathology.	2	Emp

RD 3342	Title: Radiographic Positioning II Lab	L T P C 0 0 2 1
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn radiographic positionings of various x-rays done in radiology department.	

List of Experiments

1. Upper & Lower Extremities
Hand, Forearm, Arm, Thigh, Leg, Foot

2. Shoulder Joints
Basic & special projection, Related radiological Pathology, Basic & special positioning

3. Pelvis Griddle
Basic & special projection, Related radiological Pathology, Basic & special positioning

4. Whole Spine Positioning
Cervical spine, Thoracic spine, Lumbar spine, sacrum and coccyx

5. Pediatric Radiography
Special Positioning Views for all the X-Rays.

Mode of Evaluation	Internal and External Examinations
Recommendation by Board of Studies on	24/07/2021
Date of approval by the Academic Council	14/11/2021

Course Outcome for RD3342

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to perform basic and special projection done for upper and lower extremities.	2	Emp
CO2	Students will be able to perform all projection for shoulder joint related to its radiological pathology.	2	Emp
CO3	Students will be able to perform all projection for pelvis girdle related to its radiological pathology.	3	Emp
CO4	Students will be able to perform basic and special projection done for whole spine positioning.	2	Emp
CO5	Students will be able to perform routine and special projection done in case of pediatric radiography.	1	Emp

SEMESTER 4 Year -2

RD3401	**Title: Conventional Radiographic Technique II**	**L T P C** **4 0 0 4**
Version No.	**1.0**	
Course Prerequisites	NIL	
Objectives	The main objective is too aware the student about the conventional technique of radio imaging technique like (manual image processing &fluoroscopy / dynamic imaging) Along with the image formation, developing and reading.	
Unit No.		**No. of hours (per Unit)**
Unit: I	**Portable & Mobile equipments**	10
Portable X-Ray Equipments, Mains requirements, Cable connections to wall plugs, Mobile X-Ray Equipments, X-Ray Equipments for the Operating Theatre, Direct & indirect Radiography		
Unit II	**Fluoroscopy Equipment**	10
Construction & Working principles of Image Intensifier, Direct Fluoroscopy, Viewing the Intensified image, Recording the intensified Image, Digital fluoroscopy		
Unit III	**Fluoroscopic / Radiographic Tables**	10
General features of fluoroscopic / radiographic table, The serial changer, Remote control table, The spot film devices		
Unit IV	**Tomography Equipment**	8
Principles of tomography, Various types of tomographic movement, Equipment for tomography		
Unit V	**Equipment for Cranial and Dental radiography**	10
The skull table, General Dental X-ray equipment, Pan tomography equipment, Equipment for Cranial & skeletal radiography		
Text Books	1. Curry TS, Dowdey JE, Murry RC. Christensen's physics of diagnostic radiology. Lippincott Williams & Wilkins; 1990. 2. Brant WE, Helms CA, editors. Fundamentals of diagnostic radiology. RD3402	Title: Computed Tomography	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to induce idea on cross sectional imaging of different anatomical area along with the pathology	
Unit No.		No. of hours (per Unit)
Unit: I	Introduction to CT	12
Introduction to Computed Tomography and Principle of Computed Tomography- History, Advantage and Disadvantages of CT, Basic principle of CT Generations of Computed Tomography- 1st generation, 2nd generation, 3rd generation, Slip ring technology, 4th generation, Electron beam CT, Dual Source CT, Flat Panel Detector CT Single and Multi-slice Technology		
Unit II	Instrumentation of CT	10
Instrumentation-CT scanner gantry, Detectors & Data Acquisition System, Generator, Computer and image processing System Image display system, storage, recording and communication system, CT control console, Options and accessories for CT systems.		
Unit III	CT Image	10
Image Reconstruction- Basic principle, Reconstruction algorithms, Image reconstruction from projections, Types of data reconstruction Image Display and Image Quality Image formation and representation, Image processing, Pixel and voxel, CT number Window level and window width, Qualities, Resolution, Contrast, Sharpness, Noise properties in CT		
Unit IV	Artefacts	6
CT Artefacts- Classification, Types, Causes, Remedies		
Unit V	Post processing	10
Diagnostic aspects of CT and post Processing Techniques HRCT, Isotropic imaging, Patient management, Patient preparation, positioning, Technologist role, Protocols for whole body imaging Clinical applications of CT, 2D & 3D imaging, MPR, SSD, Volume Rendering, BMD.		
Text Books	1. Seeram E. Computed Tomography-E-Book: Physical Principles, Clinical Applications and Quality Control. Elsevier Health Sciences 2. Seeram E. Computed tomography: physical principles and recent technical advances. Journal of Medical Imaging and Radiation Sciences 3. Kak AC, Slaney M. Principles of computerized tomography imaging. RD3403	Title: Equipment of Radiotherapy	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn aim, objective, philosophy and principle of Radiotherapy and Radiation safety during radioisotope therapy.	
Unit No.		No. of hours (per Unit)
Unit I	Introduction to Orthovoltage equipment	10
Orthovoltage equipment with special reference to physical design equipment of tube and its accessories and interlocks, gamma ray sources used radiotherapy especially cobalt 60 source its construction and source housing and handling mechanism.		
Unit II	Isocentric Tele-isotope Machines and Simulators	10
Principles of Isocentric Tele-isotope machines, megavoltage x-ray and electron beam accelerators and Betatron. Principles of simulators and vacuum forming machines for making casts.		
Unit III	Components of Linear Accelerator	10
Salient features of components of Linear Accelerator like tube design, wake guide, target design, beam bending system.		
Unit IV	Radiofrequency generators and Sterofoam	8
Radio-frequency generators like magnetron and klestron. Sterofoam template cutting system introduction to radio-surgery.		
Unit V	Principle of remote after loading- system	10
Basic principle of remote after-loading system/machines and sources used. Equipment and dosimetry equipment.		
Text Books	1. Sherer MA, Visconti PJ, Ritenour ER, Haynes K. Radiation Protection in Medical Radiography-E-Book. Elsevier Health Sciences 2. Brandon AN, Hill DR. Selected list of books and journals in allied health. Bulletin of the Medical Library Association. 3. Long BW, Frank ED, Ehrlich RA. Radiography Essentials for Limited Practice-E-Book. RD3404	Title: Magnetic Resonance Imaging	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to induce idea on cross sectional imaging of different anatomical area along with the different pathologies related to musculoskeletal, soft tissue Imaging.	
Unit No.		No. of hours (per Unit)
Unit: I	Introduction and Basic Principle of Magnetic Resonance Imaging	10
History of MRI, Electricity & Magnetism, Laws of magnetism, atomic structure, Motion within the atom, The Hydrogen nucleus, Precession, Larmor equation, Resonance, MR signal, Free induction decay signal, Relaxation, T1 recovery, T2 decay, Pulse timing& parameters.		
Unit II	MRI Hardware	10
Introduction, Permanent magnets, Electromagnets, Super conducting magnets, Fringe fields, Shim coils, Gradient coils, Radio-frequency coils, the pulse control units, Patient transportation system, Operator interface, Encoding, Data collection & Image formation Introduction, Gradients, Slice selection, Frequency encoding, Phase encoding, Scan timing, Sampling, data space, k-space, k-space filling and fast Fourier transformation.		
Unit III	Pulse sequences	10
Introduction To basic pulse sequences., Spin echo sequences, Conventional spin echo, Fast spin echo Inversion recovery, STIR, FLAIR, Proton Density Imaging, Gradient echo pulse sequences Conventional gradient echo**,** The study state, SSFP**,** Coherent residual transverse magnetization**,** Incoherent residual transverse magnetization**,** Ultra- fast imaging, Advanced imaging techniques, EPI. MRI parameters & Tradeoffs-Introduction, Signal to Noise Ratio (SNR) & how to increase SNR, Contrast to Noise Ratio (CNR), Spatial resolution & how to increase the spatial resolution, Scan time & how to reduce time, Tradeoffs, Decision making, Volume imaging.		
Unit IV	MRI Artefacts	8
Introduction, Phase miss-mapping, Aliasing or wrap around, Chemical shift artifact, Chemical misregistration, Truncation artefact/Gibbs phenomenon, Motion of the patient Magnetic susceptibility artefact, Magic angle artefact, Zipper artifact, shading artefact Cross excitation and cross talk. MRI contrast agent		
Unit V	Flow Phenomena & MRI angiography	10
Introduction, The mechanisms of flow, Time of flight phenomenon, Entry slice phenomenon, Intravoxel Dephasing. Flow phenomena compensation-Gradient moment rephrasing, Presaturation, Even echo rephrasing, MRI Angiography.		
Text Books	1 Westbrook, Catherine. *Handbook of MRI technique*. John Wiley & Sons 2. Möller, Torsten B., and Emil Reif. *MRI parameters and positioning*. Thieme,

RD3406	Title: Orientation in Clinical Sciences	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn basic pathological conditions related to cardiology, surgery, nephrology, orthopedic, gastrology, neurology and general medicine for the diagnosis.	
Unit No.		No. of hours (per Unit)
Unit: I		10
Pericarditis, Valvular diseases, Rheumatic Heart Disease Heart failure, Bronchitis, Emphysema Bronchitis, Pneumonia, Tuberculosis, Pleura effusion, Pneumothorax		
Unit II		8
Aclasia cardia, Peptic ulcer, Intestinal obstruction, Crohn‟s disease, Ulcerative colitis, Pancreatitis, Portal Hypertension, Ascites, Cirrhosis, Cholecystitis, Melena, Appendicitis		
Unit III		10
Hematuria, UTI, Hydronephrosis Horse shoe Kidney, Hydrocele, Glomerulo nephritis, Nephrotic Syndrome Urinary calculi, Polycystic Kidney disease, Renal failure		
Unit IV		12
Fracture, Type Mechanism, Healing, Delayed Union, Non- complication Injuries of the shoulder girdle, Dislocation of shoulder, Injuries of the carpal Dislocation of Hip, Femur, Tibia, Ankle, calcaneum, Acute & chronic osteo arthritis Rheumatoid arthritis, Paget‟s Disease, Ankylosing spondylitis Club foot, Bone Tumors-Benign Malignant, Perthes diseases		
Unit V		8
Cholelithiasis, Peritonitis, Suprahrenic Abscess, Appendicitis, Benign Hypertrophy prostate		
Textbooks	1. Kumar V, Abbas AK, Fausto N, Aster JC. Robbins and Cotran Pathologic Basis of Disease, Professional Edition E-Book. Elsevier Health Sciences 2. Mohan H. Textbook of pathology. New Delhi: Jaypee brothers‟ medical publishers

RD 3441	Title: Computed Tomography Lab	L T P C 0 0 2 1
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to induce idea on cross sectional imaging of different anatomical area along with the different pathologies in CT	
List of Experiments		
1. Patient preparation, patient positioning, performing all non-contrast and contrast Computed tomography procedures. 2. Radiation protection and care of patient during procedures including contrast media Management in CT. 3. Various post processing techniques and evaluation of image quality and clinical findings. 4. Post procedural care of the patient		
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3441

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to learn about patient preparation and positioning done for CT non-contrast procedures.	2	Emp
CO2	Students will be able to learn about patient preparation and positioning done for CT contrast procedures.	1	Emp
CO3	Students will be able to learn about different radiation protection methods in computed tomography.	3	Emp
CO4	Students will be able to know about Various post processing techniques with evaluation of image qualityand clinical findings.	2	Emp
CO5	Students will be able to know about pre and post procedural care of patient including contrast media reaction management in CT.	3	Emp

SEMESTER 5 Year -3

RD3501	**Title: Nuclear Medicine Technology**	**L T P C** **4 0 0 4**
Version No.	**1.0**	
Course Prerequisites	NIL	
Objectives	The objective is to learn basic basis about the Radioactivity & radioactivenuclides	
Unit No.		No. of hours (per Unit)
Unit: I	**Introduction to NMT and Radioactive Transformation**	10
Basic atomic and nuclear physics, History of radioactivity, Units & quantities, Isotopes, Isobars, Isomers, Radioactivityand half-life, Exponential decay, specific activity, Modes of Radioactive decay, parent daughter decay		
Unit II	**Production of Radionuclides**	10
Reactor produced radionuclide, Reactor principles; Accelerator produced radionuclide, Radionuclide generators.		
Unit III	**Radio pharmacy &Handling & Transport of Radionuclides**	10
Cold kits, Radio pharmacy used in nuclear medicine, Radiopharmaceuticals used in various procedures, Safe handling ofradioactive materials, Procedures for handling spills		
Unit IV	**Equipment of NMT**	8
Gamma camera, PET, SPECT (working principle)		
Textbooks	Bomford CK, Miller J, Kunkler H, Sherriff IH, Bomford SB, IH Kunkler SB. Walterand Miller's textbook of radiotherapy: radiation physics, therapy, and oncology. 1993.	
Reference Books	1. Cherry SR, Sorenson JA, Phelps ME. Physics in Nuclear Medicine E-Book. Elsevier Health Sciences; 2012 Feb 14. 2. Sutton, David. "A textbook of radiology and imaging." (1987). 3. RD3502	Title: Patient Care and Management	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn about the assessment and handling emergencies in the department as well as the infection controls amongst self and the patient.	
Unit No.		No. of hours (per Unit)
Unit: I	Patient care and Assessment	10
Taking history, Assessing current physical status, Skin temperature, color, consciousness, Breathing, Obtaining Vital signs, Electronic Patient Monitoring.		
Unit II	Responsibilities of the Imaging Technologist-	10
Medication administration, routes of administration, List of frequently used medications, Patient transfer technique &Restraint technique- Preparation for transfer, wheelchair transfer, stretcher transfer, immobilization techniques		
Unit III	Handling the emergencies in Radiology	10
Reaction to contrast media, Oxygen administration and suction, Respiratory emergencies, Cardiac emergencies, Trauma, Shock. Patient care during Investigation- G.I. Tract, Biliary tract, Respiratory tract, Gynecology, Cardiovascular, Lymphatic system, C.N.S. etc.		
Unit IV	Infection Control	10
Microorganism- Bacteria, Viruses, Fungi, Prions, Protozoa, Cycle of Infection, Immunity, Infectious disease, Transmission modes, Isolation techniques, Sterilization & sterile techniques		
Unit V	Patient Education & Communication	8
Patient communication problems, Explanation of examinations, Radiation Safety / Protection, Interacting with terminally ill patient. Informed Consent		
Text Books	1. Ehrlich RA, Coakes DM. Patient Care in Radiography-E-Book: With an Introduction to Medical Imaging. Elsevier Health Sciences2. Bontrager KL, Lampignano J. Textbook of Radiographic Positioning and Related Anatomy-E-Book. Elsevier Health Sciences;	
Reference Books	1. Brant WE, Helms CA, editors. Fundamentals of diagnostic radiology. Lippincott Williams & Wilkins	
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3502

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to assess current physical status and obtaining vital signs	1	Emp
CO2	Students will be able to know about the responsibilities of the Imaging Technologist	1	Emp
CO3	Students will be able to learn about handling the emergencies in Radiology	3	Emp
CO4	Students will be able to learn about infection control, Isolation & Sterilization techniques	2	Emp
CO5	Students will be able to learn about Radiation Safety / Protection, Interacting with terminally ill patient.	2	Emp

RD3503	Title: Radiation Protection and Quality Assurance	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn aim, objective, philosophy and principle of radiation protection to protect oneself from biological effect of radiation and monitoring of radiation exposure	
Unit No.		No. of hours (perUnit)
Unit: I	Introduction to Radiation Protection	10
Introduction to Radiation Protection, Units & Quantities- Primary, secondary radiation, need for radiation protection, Exposure, absorbed dose, absorbed dose equivalent, Effective dose, air KERMA, Radiation weighting factor, Tissue weighting factor, MPD. Aim & Principle of Radiation Protection- Concept of ALARA, Cardinal Principle,ICRP regulation, Radiation Protection in: Radiography, CT, Fluoroscopy, Mammography, Ward radiography, radiation shielding.		
Unit II	Radiation monitoring	10
Radiation monitoring: Personnel – Film badge, TLD, OSLD, pocket dosimeter, Area Monitoring Devices. Radiobiology: Radiolysis of water, Direct & Indirect effects of radiation, Stochastic, Deterministic effects, Somatic, Genetic effects, dose relationship, Antenatal exposure. 10-day rule, 14-day rule, 28-day rule, structural shielding, workload, use factor,Occupancy factor.		
Unit III	Quality Control	10
Quality Control and Assessment in Radiology: Quality Assurance and quality control of Modern Radiological and Imaging Equipment which includes Digital Radiography,Computed Radiography, CT scan, MRI Scan, Ultrasonography and Teleradiology and PACS related.		
Unit IV	Care and maintenance of diagnostic equipment	8
General principles and preventive maintenance for routine - daily, Weekly, monthly, quarterly, annually: care in use, special. Care of mobile equipment.		
Unit V	QA	10
Role of Radiographer in Planning, QA & Radiation Protection: Role of technologist in radiology department - Personnel and area monitoring. ICRP, NRPB, NCRP and WHO Guidelines for radiation protection, pregnancy, and radiation protection. NABHGuidelines, AERB guidelines, PNDT Act and guidelines.

RD3504	Title: Interventional Procedure and Technique	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn about the special procedures done with the interventional approaches in radiology department with the help of radiological equipment.	
Unit No.		No. of hours (per Unit)
Unit: I	Introduction to Interventional Radiology, Contrast media & Emergency Drugs	10
Need for interventional procedures, Informed consent, patient care, patient preparation, Patient monitoring, role of technologist in interventional procedure Types of contrast media, method of administration, contraindication, contrast reaction management, emergency crash cart.		
Unit II	Angiographic Equipment, Catheters & guide wires	10
Basics of Angiographic equipments, Single and biplane angiographic equipment, Angiographic Table, Image intensifier, Flat panel detector, electromechanical injectors, Catheters, types of catheters &guidewires, seldinger technique.		
Unit III	Digital Subtraction Angiography	10
Types, Instrumentation		
Unit IV	Sterile Techniques & Radiation	10
Laying up a sterile trolley, sterile techniques, radiation protection for staff and patient, protective devices, monitors.		
Unit V	Interventional Procedures	8
Cardiac, Vascular, Nonvascular.

RD3505	Title: Preventive Medicine, Health Care and Radiation Protection	L T P C 3 0 0 3
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective of this particular section of the foundation course is to sensitize potential learners with essential knowledge on basic concept of health and universal disease conditions and basic idea on radiation protection.	
Unit No.		No. of hours (per Unit)
Unit: I	Health	7
Definition and concepts of health, important public health acts, health problems of developed and developing countries, environment, and health. Definition and concepts of epidemiology, diseases, types and use of epidemiology. Basic emergency care and first aid. Epidemiology, etiology, control of communicable disease like malaria, cholera, tuberculosis, leprosy, diarrhea, poliomyelitis, viral hepatitis, measles, dengue, rabies, AIDS		
Unit II	National Health Policy and Programs	7
National Health Policy and Programs, DOTS, National AIDS control programme, National cancer control programme, universal immunization programme. Nutrition and major nutritional problems, etiology, manifestations and prevention, components of RCH care. Examination of water, food adulteration, role of regular exercise and yoga in prevention and management of various diseases.		
Unit III	Fertility and Population Control	8
Population, problems of population growth, birth rates, death rates, fertility rates, MMR., CPR, Approaches and methods of contraception, Reproductive and child health. Hygiene and sanitation, sanitation barriers, excreta disposal.		
Unit IV	Immunization	7
Immunization program, various national immunization programs and vaccine schedules, Family welfare and planning, communicable and non-communicable disease, Health planning in India including various committees, national health policy and health goals. Objectives and goals of WHO, UNICEF, Indian Red Cross Society, UNFPA, FAO, ILO		
Unit-V	General Principals and Materials	7
General Principals and Materials, Departmental protection, Protection instruments and personal monitoring, Radiation signage‟s.		
Text Books	1. Park K. Park's textbook of preventive and social medicine. 2. Leavell HR, Clark EG. Preventive Medicine for the Doctor in his Community. An Epidemiologic Approach.	
Reference Books	1. Durrani SA, Ilic R, editors. Radon measurements by etched track detectors: applications in radiation protection, earth sciences and the environment. World scientific; 1997 Jun9. 2. RD 3541	Title: Nuclear Medicine Technology Lab	L T P C 0 0 2 1
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to induce idea on cross sectional imaging of different anatomical area along with the different pathologies in NMT	
List of Experiments		
1. Patient preparation, patient positioning, performing all non-contrast and contrast NMT procedures. 2. Planning of different scanning planes, parameters & their trade-offs & patient monitoring during the procedure 3. Various post processing techniques and evaluation of image quality and clinical findings. 4. Post procedural care of the patient		
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3541

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship(Ent)/ None (*Use, for more than one*)
CO1	Students will be able to learn about patient preparation and positioning done for NMT non-contrast procedures.	3	Emp
CO2	Students will be able to learn about patient preparation and positioning done for NMT contrast procedures	3	Emp
CO3	Students will be able to perform Planning of different scanning planes by using different parameters and tradeoffs in NMT.	2	Emp
CO4	Students will be able to learn various post processing techniques and evaluation of image quality with its clinical findings.	3	Emp
CO5	Students will be able to know about pre and post procedural monitoring of patient in NMT procedures.	2	Emp

SEMESTER 6 Year -3

RD3601	**Title: Biostatics & Research Methodology**	**LT P C** **4 0 0 4**
Version No.	**1.0**	
Course Prerequisites	NIL	
Objectives	The objective is to learn about the Biostatistics, various methodology & analysis of the research.	
Unit No.		**No. of hours (per Unit)**
Unit: I		10
Introduction I: Biostatistics – Definition, Role of statistics in health science and health care delivery system. **Introduction II:** Research Methodology - Research process, Steps involved in research process, Research methodsand methodology		
Unit II		10
Accessing research literature: Use of databases and other sources		
Unit III		10
Understanding research design: Qualitative and quantitative methodologies - their differences and potential integration. Evaluating research and its potential for informing practice. Developing research questions and devising methods for their investigation. Ethical issues in research		
Unit IV		8
Analysis: Analysis of qualitative and quantitative data. Utilization of appropriate software to assist in the retrieval of information and data analysis		
Unit V		10
Clinical audit: Distinctiveness of research and audit processes and their function **Research Skills and Management**: The role of evidence-based practice within health and welFare.

RD3603	Title: Advance CT, MRI, USG	L T P C 4 0 0 4
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to learn about the recent advancements& new imaging modalities. Outline of advanced CT/ MRI/ USG & Doppler.	
Unit No.		No. of hours (per Unit)
Unit: I		5
Helical CT scan: Slip ring technology, advantages, multi detector array helical CT, cone – beam geometry, reconstruction of helical CT images, CT artifact, CT angiography, CT fluoroscopy, HRCT, post processingtechniques: MPR, MIP, Min IP, 3D rendering: SSD and VR, CT Dose.		
Unit II		5
MRI imaging methods – Head and Neck, Thorax, Abdomen, Musculoskeletal System imaging Clinical indicationsand contraindications- types of common sequences on imaging Protocols for various studies- slice section- patient preparation-positioning of the patient Plain studies- contrast studies -special procedures- reconstructions- 3D images- MRS blood flow imaging,diffusion/perfusion scans - strength and limitations of MRI- role of radiographer.		
Unit III		5
Techniques of sonography-selection- Preparations - instructions and positioning of patient for TAS, TVS, TRUS, neck USG and extremities- biopsy procedures, assurance to patients.		
Unit 1V		5
CT of head and neck – thorax – abdomen – pelvis – Musculo skeletal system – spine –PNS. Anatomy – clinicalindications and contraindications – patient preparation – technique – contrast media-types, dose, injection technique; timing, sequence - image display – patient care – utilization of available techniques & image processing facilities to guide the clinician- CT anatomy and pathology of different organ systems.

RD3605	Title: Medical Law and Ethics	L T P C 3 0 0 3
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	Legal and ethical considerations are firmly believed to be an integral part of medical practice in planning patient care. Advances in medical sciences, growing sophistication of the modern society‟s legal framework, increasing awareness of human rights and changing moral principles of the community at large, now result in frequent occurrences of healthcare professionals being caught in dilemmas over aspects arising from daily practice.	
Unit No.		No. of hours (per Unit)
Unit: I	Medical ethics	5
Medical ethics - Definition - Goal – Scope, Introduction to Code of conduct, Basic principles of medical ethics – Confidentiality, Malpractice and negligence - Rational and irrational drug therapy		
Unit II	Autonomy and informed consent	5
Autonomy and informed consent - Right of patients Care of the terminally ill-Euthanasia		
Unit III	Medico legal aspects of medical records	5
Medico legal aspects of medical records – Medico legal case and type- Records and document related to MLC - ownership of medical records - Confidentiality Privilege communication - Release of medical information - Unauthorized disclosure - retention of medical records -other various aspects.		
Unit IV	Professional Indemnity insurance policy	4
Professional Indemnity insurance policy Development of standardized protocol to avoid near miss or sentinel events Obtaining an informed consent.		
Unit V	Basics of emergency care and life support skills	5
Basics of emergency care and life support skills Vital signs and primary assessment, Basic emergency care – first aid and triage, Ventilations including use of bag-valve-masks (BVMs), Choking, rescue breathing methods, One- and Two rescuer CPR, using an AED (Automated external defibrillator), Managing an emergency including moving a patient.		
Textbooks	1. Kennedy I, Grubb A. Medical law. London: Butterworths. 2. Jackson E. Medical law: text, cases, and materials. Oxford University Press. 3. Recent Trends in Medical Imaging (CT, MRI ands)	
Reference Books	1. Bontrager KL, Lampignano J. Bontrager's Handbook of Radiographic Positioning and Techniques-E-BOOK. Elsevier Health Sciences. 2. Frank ED, Long BW, Smith BJ. Merrill's Atlas of Radiographic Positioning and Procedures-E-Book. Elsevier Health Sciences.	
Mode of Evaluation	Internal and External Examinations	
Recommendation by Board of Studies on	24/07/2021	
Date of approval by the Academic Council	14/11/2021	

Course Outcome for RD3605

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be Introduced to medical law and ethics.	3	Emp
CO2	Students will be able to study about Autonomy, informed consent, and rights of patients.	1	Emp
CO3	Students will be able to study about Medico legal aspects of medical records.	2	Emp
CO4	Students will be able to learn about Professional Indemnity insurance policies.	2	Emp
CO5	Students will be able to study about the basics of emergency care and life support skills.	3	Emp

RD 3641	Title: Clinical Aspects in Radio Imaging Lab	L T P C 0 0 2 1
Version No.	1.0	
Course Prerequisites	NIL	
Objectives	The objective is to induce idea on cross sectional imaging of different anatomical area along with the different pathologies in various radiological modalities.	

List of Experiments

1. Scanning protocol, Indication, Patient preparation, image quality: Computed Tomography i.e., based on clinical exposure and practices.
2. Scanning protocol, Indication, Patient preparation, image quality: Magnetic Resonance imaging i.e., based on clinical exposure and practices.
3. Scanning protocol, Indication, Patient preparation, image quality: Nuclear Medicine Technology i.e., based on clinical exposure and practices.
4. Scanning protocol, Indication, Patient preparation, image quality: Ultrasonography and Mammography i.e., based on clinical exposure and practices.
5. Scanning protocol, Indication, Patient preparation, image quality: Digital Radiography & Interventional Radiology i.e., based on clinical exposure and practices.

Mode of Evaluation	Internal and External Examinations
Recommendation by Board of Studies on	24/07/2021
Date of approval by the Academic Council	14/11/2021

Course Outcome for RD3641

Unit- wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (*Use, for more than one*)
CO1	Students will be able to perform all scanning protocols done in computed tomography based on clinical pathology and exposure.	1	Emp
CO2	Students will be able to perform all scanning protocols done in magnetic resonance imaging based on clinicalpathology and exposure.	2	Emp
CO3	Students will be able to perform all scanning protocols done in nuclear medicine instrumentation based on clinical pathology and exposure.	3	S
CO4	Students will be able to perform all scanning protocols done in ultrasonography and mammography based onclinical pathology and exposure.	2	Emp
CO5	Students will be able to perform all scanning protocolsdone in digital radiography and interventional procedures based on clinical pathology and exposure.	2	Emp
